Fire and safety regulations

We do a lot to look after each other here on the campsite, so it is important we all comply with applicable safety regulations.

According to the fire regulations, sites may only be fenced on 3 sides. You may not set up your own wooden fences or establish garden gates. Small movable wire fences to keep the dog inside is allowed but must be approved by the camp manager and removed when the unit is unoccupied. Illegal fences will be removed.

Safety distance 3 m

There may ONLY be tool tents between the units if the rule can be observed. A tool tent must be close to your own or a neighbor's caravan, but there must always be at least 3 m to the nearest other unit. The same rules apply to pavilions and annex carriages on double sites.

Fire equipment

We have fire hydrants located all over the site - pay attention to where the closest one is in relation to your site. Defibrillators hang at the reception and the main entrance. See the sitemap...
